

Dear Encinitas Ranch HOA,

We will be conducting the 2022 annual tree maintenance for your community. The project is scheduled to begin the week of February 1st through April 1st. We will be moving throughout the community from north to south. Our trucks will be going with the flow of traffic down each street then back the other side. We will post no parking signs on areas where we need access and cars not to park. Below is a little detailed information regarding the pruning we will be doing and their definitions.

Clearance pruning- Selective pruning in order to clear walkways, buildings, roadways, carports, etc.

Structural pruning: Selective removal of live branches and stems to influence the orientation, spacing, growth rate, strength of attachment and ultimate size of branches and stems.

Reduction pruning: Selective pruning to decrease height and/or spread by removing specific branches.

We understand this project will cause some slight inconvenience to the residence due to traffic control and use of some street parking areas while we are on site. We would like to ask (and thank you in advance) for your cooperation in working with our team to assure the project runs smoothly.

Thank you for giving BrightView the opportunity to continue to provide you with professional and quality tree care.
